Subject: Permanent Foundation System by Foundation Works

Dear Jason:

This concerns the foundation system manufactured by Foundation Works. Any proprietary system such as the one you produce is “approved” for use with Fleetwood manufactured housing when such system is in compliance with the following stipulations in the excerpt from the *Fleetwood Home Installation Manual*:

Proprietary Foundation Systems

Any commercial, proprietary foundation system may be used for support of the home for gravity and/or wind loads as long as it complies with all of the following:

- Listed by a nationally recognized third-party
- Evaluated and approved by a professional engineer (any state)
- Installed in complete accordance with the foundation manufacturer’s instructions

As long as your system complies with these conditions I see no reason not to permit the use of the Foundation Works Permanent Foundation System on Fleetwood manufactured home.

If you have any other questions about this project please do not hesitate to contact me.

Sincerely,

FLEETWOOD ENTERPRISES, INC.
