Mr. Jason Matthews
Regulatory Coordinator
Foundation Works, Inc.
7600 Boeing Drive
Greensboro, NC 27405

Dear Mr. Matthews,

This letter is in response to your letter to John Mikel of Skyline Corporation. That letter concerned your company's setup system for manufactured homes.

Skyline Corporation approves the use of the "Foundation Works Permanent Foundation System with Primary Support Columns and Perimeter Surround Wall for Manufactured Homes" as described in the TRA Evaluation Report File number 7046 providing the following conditions are met:

- The local authority having jurisdiction has approved the "Foundation Works System".
- The setup of homes using the "Foundation Works System" is in accordance with the published installation instruction by the system's manufacturer.
- The homes being setup with the "Foundation Works System" are covered by the installation instructions for unit width, I-Beam spacing, maximum roof eaves, roof pitch, Wind Zone, maximum sidewall height, etc.
- A registered professional engineer has certified the setup system.

I trust this information will meet your needs. Feel free to call me at the above telephone number if you have any further questions or comments.

Sincerely,

Jeffrey T. Legault, P.E.
Structural Engineer

CC: John Mikel
